Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Steinetz et al (US. 5,076,590).

Steinetz discloses a silicon carbide fiber brush seal (seal 12 having silicon carbide fibers 22).

The silicon carbide is in the form of fiber tow. The silicon carbide is in the form of braided strand (column 3, line 26).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Steinetz in view of Rice (US. 4,642,271).

Steinetz discloses the invention substantially as claimed above but fails to disclose that the brush seal is coated with a boron nitride based coating. Rice discloses a ceramic fiber that is coated with boron nitride. It would have been obvious to one having ordinary skill in the art at

the time the invention was made to have the silicon carbide fibers of Steinetz to be coated by boron nitride as taught by Rice, to provide improve strength and toughness of the ceramic fibers (see abstract of Rice).

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Steinetz in view of Steinetz et al (US. 4,917,302).

Steinetz discloses the invention substantially as claimed above but fails to disclose that the silicon carbide is in the form of woven fabric. Steinetz '302 discloses that a brush seal is formed of braided fibers or fibers that is woven into fabric. It would have been obvious to one having ordinary skill in the art at the time the invention was made to configure the braided form of brush seal of Steinetz to be a woven fabric form as taught by Steinetz '302, since having a brush seal that is braided or woven is considered to be art equivalent (column 3, lines 17 of Steinetz '302).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kennedy teaches to have a body formed by woven ceramic fibers that is coated with boron nitride. Vernon and Thebault.
